

Creating a Workflow

To create a Workflow:

1. Click the **Toolbox**.
2. Drag and drop the required nodes from the toolbar.

NOTE:

To delete a node, select the node, click **MANAGE** in the right properties bar and click **DELETE**

To duplicate a node, select the node, click **MANAGE** in the right properties bar and click **DUPLICATE**

3. Click the nodes to set the the arguments and properties.
The properties window is displayed on the right corner when a node is selected.

4. Set the argument values and other required properties.
5. Connect the nodes with the required flow.

6. To save the workflow, click

on the **Left Pane**. The save window opens.

The screenshot shows the 'Save Workflow' dialog box. It has a blue header bar with the text 'SAVE' and a close button 'X'. The dialog contains three input fields: 'Workflow Name' (with a character count '0/50'), 'Workflow Version', and 'Description'. At the bottom right, there are two buttons: 'CLOSE' and 'SAVE'.

Fill the following information.

- **Workflow Name** - The Name of the Workflow
- **Workflow Version** - The Version of the Workflow

- **Description** - The Description of the Workflow

7. Click **Save**.

NOTE: Click

to clear the workflow.
