# Configurations

Use this to configure the common configurations such as the server configurations, security token, etc.

1. On the bottom right corner, click

   . The Configurations view is displayed.

2. Enter the Key.
    - Configuration - Server IP, Port, Database Information.
    - Header - Header Data (Security Token).
3. Enter the Value for the key.
    - Configuration - Eg: 192.145.124.012:1111
    - Header - Eg: 71e9a5
4. Select the Category.
    - Select whether the entry is Configuration or Header.
5. Click **ADD** to add the common configuration.
